About me

During my free time, I like reading mystery and fiction books and practising some sports such as football, volleyball and biking. I like to spend time with my family and friends. I enjoy team work.

Education

PhD: October 1st 2021-current

Title: Dynamics of pure and doped superfluid Helium droplets using ^{4}He-TDDFT simulations.

- [ ] Helium Time Dependent Density Functional Theory (^{4}He TD-DFT)
- [x] Clusterization of foreign atoms within ^{4}He nanodroplets.
- [ ] Quantum Vortices
- [x] Coalescence of ^4He_N nanodroplets
- [ ] Coulomb explosion of Ak_2 on ^4He_N nanodroplets

During my PhD, I have developed and/or improved some skills such as teamwork, Fortran 90,C++ and Python programming as language, handling GIT-HUB repositories, and Unix system. I have delivered a certain amount of speeches both international and national. I have written papers which they have been very useful when writing in Latex code (scientific writing program)
